

MinerU Preflight Smoke Document

Synthetic single-page fixture to verify the MinerU pipeline runs end to end: it carries body text (OCR/layout), a displayed equation (formula), and a raster figure (image extraction). Content is fixed so the golden is stable.

$$E = mc^2 \quad \int_0^{\infty} e^{-x^2} dx = \frac{\sqrt{\pi}}{2}$$

Figure 1: synthetic gradient

The figure above is an embedded raster image; the equation above exercises formula detection; this paragraph exercises text extraction. End of document.
